PREMIUM FESCUE BLEND

Low-Maintenance Turf for Sustainable Landscapes

Premium Fescue Blend is a finely textured sod mix developed for durability, adaptability, and reduced maintenance. Combining four complementary fescue varieties in equal proportions, this blend produces a dense, natural-looking turf well suited to Alberta's climate and environmental conditions.

Engineered for performance in shaded and low-traffic areas, it offers excellent drought tolerance, cold hardiness, and salt resistance. With minimal fertilizer and irrigation requirements, Premium Fescue Blend is an ideal solution for environmentally conscious landscapes, prairie settings, and erosion control applications.

PERFORMANCE CHARACTERISTICS

ATTRIBUTE	PERFORMANCE
Shade Tolerance	High
Drought Tolerance	High
Salt Tolerance	Moderate to High
Wear Tolerance	Low to Moderate
Maintenance Needs	Low

COMPOSITION

25% Sheep Fescue
25% Chewings Fescue
25% Creeping Red Fescue
25% Hard Fescue
TWCA Certified

APPLICATIONS

Ideal for residential lawns, commercial landscapes, municipal spaces, and naturalized areas where reduced maintenance and environmental resilience are priorities.

With over 50 years of expertise behind it, Premium Fescue Blend offers a dependable, sustainable turf solution built for Western Canadian conditions.

KEY BENEFITS

- ✓ Fine-textured turf with a natural, uniform appearance
- ✓ Excellent performance in shaded and semi-shaded areas
- ✓ Requires less water, fertilizer, and overall maintenance
- ✓ Adapted to prairie climates and challenging site conditions
- ✓ Effective for erosion control and low-traffic applications
