

# Blue Grass

## PRO-BLEND PERFORMANCE SOD

### Versatile Turf Solution for Alberta Landscapes

Pro-Blend Sod is a thoughtfully balanced turf mix designed to perform reliably across a wide range of Alberta growing conditions. By combining select Kentucky bluegrass varieties with resilient fescues, it delivers a rich green appearance with improved drought tolerance, adaptability, and consistent performance in both sun and shade.

A key advantage of this blend is its slower growth rate—establishing and growing at roughly half the speed of traditional Kentucky bluegrass. This reduces mowing requirements, making it especially well suited for commercial and municipal applications where lower maintenance and long-term sustainability are priorities, while still providing a durable and attractive lawn.

### PERFORMANCE CHARACTERISTICS

ATTRIBUTE	PERFORMANCE
Drought Tolerance	Moderate to High
Shade Tolerance	Moderate to High
Salt Tolerance	Moderate
Wear Tolerance	Moderate
Maintenance Needs	Moderate

### COMPOSITION

30% Tirem Kentucky Bluegrass
10% Full Moon Kentucky Bluegrass
35% Xeric Creeping Red Fescue
25% Enchantment Chewings Fescue
TWCA Certified

### APPLICATIONS

Ideal for home lawns, commercial properties, and municipal spaces where versatility, reduced maintenance, and long-term reliability are key.

With decades of growing expertise behind it, Pro-Blend Sod offers a dependable, well-rounded turf solution built for Western Canadian environments.

### KEY BENEFITS

- ✓ Suitable for a wide range of residential and commercial uses
- ✓ Attractive, vibrant colour with a natural turf appearance
- ✓ Improved drought tolerance for water-conscious landscapes
- ✓ Adaptable to both sunny and partially shaded areas
- ✓ Slower growth rate reduces mowing and maintenance requirements
